Interdependent Brilliance

JUDGMENT

Leadership in 13's Fellowship – the World Economic Foundation – is extremely unbalanced Heaven dynamic with top-down, autocratic, ideological leadership.

This unbalanced Heaven reverses completely to the People being above with a cooperative dynamic featuring mutual service and support and the warm-hearted, interconnected Fire within.

Nuclear 44 involves dealing with tricky encounters coming from below but if prosecuted with patience, attention to detail and gentleness all can be well, being only one step removed from Hexagram #1.

What this Cast declares is that the WEF leadership needs to entirely change meaning the organization as is is NOT a good one.

Initial Evaluation

13 is an ideal Hexagram for the World Economic Forum for it shows very powerful five yang hexagram ruled in the 2nd line, the line of the people, the community. However, with three in a row changing lines in the upper trigram, the leadership level, it turns to 36 Darkening of the Light, Wounding of the Bright, the image being that of the Sun sinking below the Earth.

Since the WEF is a leadership operation, the fact that all three lines change hints that it cannot be trusted for it morphs into its opposite. As does the meaning from 13 to 36. In short, the answer to the query is straightforward: WEF is Evil!!

44 is often regarded as unfortunate: a yin element intruding yang #1 from below. Likened to an Encounter, the idea is that these are often ill-omened meetings which lead to no good. The difference between #44 and #13 is that the yin line has moved one place up, ie is advancing, which is a little ominous perhaps if indeed that element is up to no good.

YI TEXTS

Changing Lines

4. Fourth Nine **Mounting on high city walls, Unable to attack. Good fortune.**

Mounting on the high walls. Unable to attack. Bind with morality and justice, Not insisting on attacking. Good fortune. Due to return to the truth.

5. Fifth Nine **Seeking harmony Begins with crying and weeping, Ends with laughing. The great multitude succeeds in meeting.**

The beginning of seeking harmony, Straight in hearts. After struggling they meet; Celebrate the victory.

6. Top Nine **Seeking harmony in the countryside. No regret.**

Seeking harmony in the countryside. One's ambition is not yet fulfilled.

Trigram Analysis

Upper: **Unbalanced Heaven** in 4,5,6 lines of 13 changing to **Balanced Earth** in 36: Unbalanced Heaven has to do with overly dictatorial leadership. Balanced Earth has to do with community participation, yielding, serving, cooperating. This is a clear shift. Also, the leadership switches to yin in 5th place versus all that yang in Heaven above in 13.

Derived 36 is traditionally quite negative. However, in the context of the query it can mean that the change from autocratic 13 unbalanced Heaven to Earth means that power is restored to the people, along with Clarity and interconnectedness with from lower trigram Fire.

The inference I take from this is that the WEF is not a good organization and needs to be entirely flipped from top-down to people-first. To my mind it means that the entire thing needs to be abandoned and something very different take its place.

Heaven Earth Man

HEAVEN:	Assertive Yang Society	☰ - ☰	Old Yang	11	Peace, Harmony
EARTH:	Decisive Clarity	☷ - ☷	Young Yang	21	Cutting Through
MAN:	Gentle Leadership	☰ - ☷	Young Yin	44	Intercourse, Lower thrust
	☰ ☷ ☰	☰ ☷ ☰	☰ ☷ ☰	☰ ☷ ☰	☰

HEAVEN shows a favorable outlook after substantive change.

EARTH involves punishment and reform – cutting through the corruption

MAN involves intercourse of Yang with Yin coming from below, which is tricky.

Line Analysis

All three changing lines in upper trigram is extreme problems at leadership level which must change to their opposite – service and cooperation versus top-heavy autocracy.

Notes

- Heaven of Leadership and Power changing to Earth, the masses, the People – the Hegemon will have to surrender its power of the One to Many.
- From left to right we start with one yin in 1st place, then 1 yin in 2nd place (yin rising) and then 5 yins in the Derived 36. So this is a process replacing top-heavy leadership with something more people-centric.

Summation

44 is a little worrisome even though the trigrams are fine: Gentleness within strong leadership above. The inner/nuclear process within the changes that must take place in 13 > 36 involves patient, step by step penetration into the situation in accordance with Heaven, which ultimately is all-good when manifested properly.
